SUMMARY

Senior Full-Stack Software Engineer with 6+ years building production SaaS platforms end to end. Principal backend contributor to Spot2Nite, an RV-resort booking and management platform on Elixir/Phoenix, where I own the payments, reservations, search, and inventory systems and led a small engineering team. Built 17+ PMS/OTA and payment integrations and a centralized real-time inventory engine, and authored an open-source Elixir library published on Hex.pm.

PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer

Jun 2021 – Present

Spot2Nite | Remote – New Orleans, LA, USA

- Principal backend contributor (9,000+ commits) to an Elixir/Phoenix umbrella platform for RV-resort booking and management; led a small team of two engineers and defined architecture across backend, web, and mobile.
- Designed and built a centralized inventory engine that synchronizes availability and rates in real time across multiple property-management systems (PMS) and OTAs, and ran large legacy-to-new data migrations into the new OTA inventory models.
- Built 17+ third-party integrations spanning PMS/OTA and payments: Campspot, Newbook, Checkfront, Channex (RoverPass, ReservationKey), RMS, ResNexus, Staylist, Indio, RJourney, Banter, Recreation, Rez Expert, Firefly, Premier Campground, FareHarbor, MySites, and Stripe / Stripe Connect.
- Optimized the location search engine, cutting long searches from up to 14 seconds to about 200 milliseconds through query tuning and database indexing.
- Owned the reservation payments and checkout system end to end as sole developer, including Stripe Connect and virtual cards.
- Designed and shipped a public GraphQL API that lets third-party platform partners – including Good Sam, Reserve America, and Outdoorsy – create reservations programmatically.
- Built the FleetSync administration app to manage fleets, vehicles, and inventory (Next.js, Radix UI, Tailwind, TanStack Query, DocuSign).
- Contributed features to the Spot2Nite mobile app (React Native), including integrating the reservation payment flow.

Full-Stack Developer

Sep 2019 – Jun 2021

Foxlabs | Remote – Playa del Carmen, Mexico

- Developed web applications and integration/connection scripts for agency clients.
- Built backend and mobile features for Pingala's "Reciprocal," a club reservations and membership-management platform.
- Began contributing to Spot2Nite's Elixir/Phoenix backend, later joining the product full time.
- Developed NestJS microservices integrating WooCommerce, a Node/TypeScript transactional email API (Express, Nodemailer, MJML), and TypeScript/SASS marketing sites.

Web Developer

2018 – 2019

Telweb (formerly Webtel / Enlaces Playa; now Meguz) | Playa del Carmen, Mexico

- Built and maintained internal business applications for the company and its clients.
- Worked with PHP/Laravel and JavaScript (Vue.js); started as an intern and grew into a developer role.

EDUCATION

B.Eng. in Information Technology

2019

Universidad Tecnológica de la Riviera Maya | Playa del Carmen, Mexico

TECHNICAL SKILLS

Languages: Elixir, JavaScript, TypeScript, SQL, PHP, Python

Backend: Phoenix, Absinthe (GraphQL), Ecto, Oban, OTP, REST & OTA/XML APIs, NestJS, Node.js/Express

Frontend: React, Next.js, React Native, Vue.js, Angular (basic), Apollo Client, Tailwind CSS, Radix UI

Data & Infrastructure: PostgreSQL (pg_trgm, indexing, performance tuning), Docker, Docker Compose, CI/CD, VPS deployment

Integrations: Stripe / Stripe Connect, 15+ PMS/OTA gateways, third-party payment gateways

Practices: System architecture, API design, database optimization, data migrations, test-driven development (TDD) with ExUnit

AI-Assisted Development: Daily Claude Code with agent/CLAUDE.md workflows and Engram (open-source MCP persistent-memory for AI coding agents); built AI-assisted tooling and product features

OPEN SOURCE

Ferry — Open-source Elixir library on Hex.pm — an in-memory operation queue with configurable batching, a dead-letter queue for failure handling, telemetry, and back-pressure limits, each instance running its own supervision subtree.

LANGUAGES

Spanish: Native

English: Professional reading and written communication; limited spoken
